

SABO

SABO CATALOGUE 2025

YOUR GARDEN, OUR CRAFT.

These names are synonymous with quality - the team behind the SABO brand.

Alexander G., Alexey N., Anastasija H., Andreas B., Armin S., Burkhard K., Can D., Carsten W., Christian E., Christian H., Christoph W., Daniel E., Daniel W., David G., Dieter S., Dietmar B., Dimitri M., Eduard K., Elisabeth R., Emanuel P., Florian L., Frank S., Friedrich D., Gabriele B., Hans L., Helmut B., Hermann K., Iris B., Jennifer D., Jens O., Johannes D., Jonas M., Julian S., Katharina H., Kay K., Konstantin D., Lars D., Lukas K., Luzie B., Maikel F., Marc H., Marian I., Maurice G., Melanie M., Michael K., Mike H., Mojtaba J., Natascha F., Nick M., Niclas R., Olav K., Omid J., Petra H., Pierre J., Robert S., Roman F., Romulus M., Sabine S., Salvatore V., Sascha S., Sebastian H., Sebastian M., Sebastiano V., Sergey C., Siegfried A., Stefan H., Stefan P., Stephan P., Thomas S., Thomas K., Thomas G., Tim K., Torsten W., Ute K., Uwe K., Viktoria B., Waldemar H., Yevhen V., Yilmaz B., Yusuf T., Zerae Girmay T. From us to you - **Passionately crafted.**

Where quality is at home.

SABO: Experience you can feel – for over 9 decades.

Located in Gummersbach from the very beginning: The SABO manufacturing site.

Uncompromising brand quality has been the focus at SABO for over nine decades. In Gummersbach, Germany, we combine advanced technologies, high-quality materials and sophisticated, functional design to create reliable tools that make gardening more efficient and enjoyable: We share our passion for innovation and quality with our SABO retail partners. Together, we want to continue to convince you of our expertise in the future.

Our versatile product range extends from powerful petrol lawnmowers and practical battery systems to multifunctional lawn tractors. On the following pages, you will find a range of practical information about our products, as well as helpful tips for successful lawn care.

Further back in the catalogue you will find a clear overview of our entire product range, including comparative technical data. We hope you enjoy discovering SABO products and wish you a successful gardening season!

New season highlights

We're constantly perfecting our products – whether it's through improved components or new features. Amongst many other refinements, we are proud to present our most exciting innovations for 2025.

Garden shredder

The COMSTAR 210 brings efficiency to gardening with its patented shredding technology. Thanks to the innovative ELIET CHOPPING PRINCIPLE™, it shreds wood along its natural fibre structure – for optimum results when processing garden waste.

See more on page 20

Battery-powered combi-tool

Makes trimming hedges and pruning trees easier than ever: the pole pruner has an impressive 25 cm long saw blade, and the pole shears with 51 cm long double blades can cut branches up to 18 mm in diameter with precision and ease.

See more on page 28

THE START OF YOUR PERFECT TURF.

Finding the right mower for your garden.

Your garden deserves an immaculate lawn – and the right lawn mower is an essential tool for achieving this.

But which model is right for you? What features are really important? With our tips and the high-quality SABO range, you are sure to find the machine that meets your requirements – for a comfortable, reliable and long-lasting mowing experience.

1. THE RIGHT DRIVE AND THE RIGHT SIZE

Battery mower, petrol mower or lawn tractor?

The size of your garden will determine which machine is right for you. Our powerful battery mowers are ideal for small to medium-sized lawns – they are light, quiet and environmentally friendly. For areas up to 5,000 m², we recommend our powerful petrol mowers. And if you have an even larger garden, you can enjoy the comfort of a lawn tractor and get the job done in comfort.

2. SUPERIOR VALUE

A good lawn mower is an investment that will last for many years. That is why quality should be the top priority: robust blades, a reliable drive system and a long-lasting gearbox are of decisive importance. SABO lawn mowers meet these requirements: they are subjected to rigorous endurance tests and inspection procedures right from the development phase to guarantee the highest quality and durability. We have been synonymous with German engineering and precise workmanship since 1932.

3. GUARANTEED TO LAST

Whether your lawnmower is battery-powered or petrol-powered, you want to be confident that it will have a long service life. That is why you should look for comprehensive warranty conditions. SABO, for example, offers a 15-year guarantee on the aluminium housing of its lawn mowers*. This gives you the assurance that you will enjoy your SABO for many years to come.

4. SPARE PARTS, EVEN YEARS LATER

The availability of spare parts is an important factor in the purchase of a lawn mower. Make sure that you can easily obtain genuine spare parts in the long term. Avoid cheap imitations that can compromise the performance and safety of your machine. SABO offers you original spare parts even many years after a series has been discontinued – for maximum durability and value retention of your lawn mower.

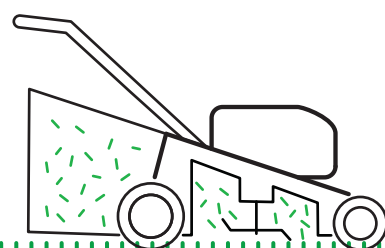

5. EXPERT ADVICE AND SUPPORT

Put your trust in professional advice and first-class service. Specialist dealers not only provide you with individual advice, but are also a reliable point of contact for maintenance and repairs. SABO lawn mowers are traditionally sold through trained and authorised dealers who are at your side with their expertise and service.

LAWN MOWERS

Whether for small town gardens or extensive green spaces, SABO offers lawn mowers in various sizes with cutting widths from 40 to 54 cm. Choose from powerful petrol engines or environmentally friendly battery-powered models. With innovative technology and ergonomic design, our lawn mowers ensure maximum user comfort.

But whichever model you choose, all our mowers have one thing in common: the highest quality. Since 1932, our machines have stood for durability, reliability and perfect mowing results.

MULCHING MOWER

A lawn maintained with a mulching mower looks fresh and healthy all year round. Mulching leaves the finely shredded grass clippings on the lawn, acting as a natural fertiliser. This provides your lawn with nutrients in a natural way and saves you having to use additional fertiliser. With SABO mulching mowers – suitable for private and professional use – you can mulch effortlessly and efficiently.

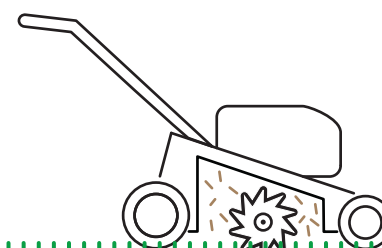

By the way, almost all of our rear discharge lawnmowers can be retrofitted with a mulching kit, so you can switch between mowing and mulching at your convenience.

SCARIFIERS

Periodic scarifying ensures an even and healthy lawn: SABO scarifiers make millimetre-deep incisions in the soil, remove moss and thatch and thus promote soil aeration. The result: a vital lawn that can better absorb water and nutrients. Regular scarifying also encourages new growth and makes your lawn denser.

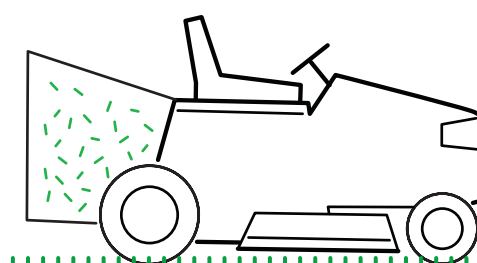

With proven SABO quality and durability, our scarifiers are the ideal addition to your lawn care equipment.

LAWN TRACTORS

If you have large areas to maintain, SABO lawn tractors are the perfect choice: they tackle even the biggest jobs effortlessly and offer maximum driving comfort. Equipped with powerful and durable 4-stroke engines and continuously variable hydrostatic transmission, they are ready for a wide range of applications. Large hoppers reduce the number of emptying operations and save valuable time.

With optional accessories such as a dozer blade, sweeper or mulching plug, our lawn tractors become true all-rounders – for year-round gardening and even more enjoyment.

* In accordance with SABO warranty conditions. 15 year guarantee on the aluminium housing for domestic use. Not valid for commercial use.

HOW WE GOT TO WHERE WE STAND.

SABO - from an ambitious founder to a living company philosophy.

TODAY

The SABO product range has expanded considerably in the more than 90 years since the company was founded. Today, in addition to lawn mowers, it also includes scarifiers, mulchers, lawn tractors, garden shredders and machines for municipal use. The range is complemented by cordless garden tools such as brush cutters and hedge trimmers, as well as high quality garden accessories. What has not changed - and never will - is the uncompromising demand for the highest quality. This is deeply rooted in SABO's DNA and is the reason why the brand stands for first-class workmanship and maximum reliability among hobby and professional gardeners alike.

1932

In the early days, SABO only sold car oils and greases. While Walter Born left the company just one year later, Heinrich Sanner established the second pillar of his company: the technical innovations department - always with the aim of offering his customers the best possible service. SABO also manufactured grease nipples for aeroplanes, traded in hand cleansers and operated a specialised graphite business. So Sanner spent the first few years exploring new business opportunities - until he came into contact with the green market for the first time.

2023

After almost 30 years, SABO is returning to private ownership. This marks the beginning of a new era, with a clear vision and a strong commitment to the company's values.

This return gives us the freedom to consistently implement our vision and respond even more strongly to the needs of our customers'

- Lars Daniel, Managing Owner

2017

No power cord, no petrol, no local emissions. SABO is marketing a new category of garden tools with modern battery technology - for both professional and amateur gardeners. From lawnmowers to brushcutters, hedge trimmers and leaf blowers, the powerful lithium-ion batteries allow convenient use anywhere.

1952

The war is over. Sanner noticed that many hedges in Germany had not been cut for a long time. He looked for a way to make this time-consuming and tedious gardening work easier for people. And so, in 1952, he developed the electric hedge trimmer. The founder of the company quickly discovered the huge potential of this market - and just like the hedges, the idea quickly sprouted new shoots.

1954

Heinrich Sanner was ambitious in his search for further ideas to make work in parks and gardens easier. And he was successful: in 1954, SABO developed its first motorised lawnmower for professional use - a pioneering step. Sanner's aim was always to achieve the best in all his products. Thanks to the economic upturn in Germany, motorised lawnmowers also became popular with amateur gardeners. It became clear to SABO that both the motor mower and the fittings sectors offered the greatest opportunities for growth. Sanner began to systematically market both areas.

HOW IT STARTED.

It all started just after the Great Depression in 1932: Times were extremely hard. Nevertheless, full of optimism, Heinrich Sanner and his partner Walter Born founded the company SABO-Zentral-Vertrieb für Mineralölprodukte und technische Neuheiten. The syllable SA stood for Sanner and BO for Born. SABO was born.

1965

In 1965, SABO developed the world's first fully hydraulic mower for professional use. For the user, this means even less work, less wear and tear, easier maintenance and thus greater economy. In 1969, the two divisions of lawn mowers and fittings are developed independently of each other. The development and production of lawn mowers remained in Gummersbach, while the fittings division moved to Wiehl.

1978

Once again, it was the spirit of invention that pushed SABO forward at the end of the 1970s: in 1978, the brand introduced the patented TurboStar-System™. Thanks to this innovative idea, even wet grass can now be optimally cut and completely collected in the grass bag. Turbo also meant acceleration in economic terms:

at the beginning of the 1980s, SABO took a decisive step forward and became the market leader in the lawnmower sector.

2007

SABO has always put the user first. In order to continuously improve the working experience, SABO introduced the 'Anti-Vibration System' for its professional lawnmowers in 2007. The system significantly reduces vibrations at the wrist. This allows the user to work safely and in a relaxed manner throughout the day.

1981

At the beginning of the 1980s, SABO added scarifiers to its product range.

Since then, SABO scarifiers have stood for quality, durability and performance. These are characteristics that were already recognised in the lawnmowers.

PASSION MADE IN GERMANY.*

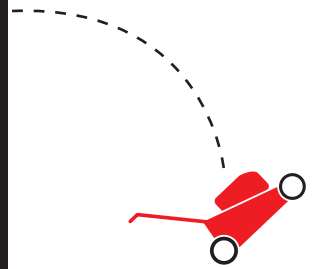

How SABO and its employees
have ensured the famous
SABO quality for decades.

* Only walk-behind mowers and scarifiers are manufactured in Gummersbach.

THE DAY THE LAWN MOWER LEARNT TO FLY

At SABO, we like to tell the anecdote of company founder Heinrich Sanner on the subject of quality control: Sanner simply tossed the lawnmowers out of the window. They were then examined to see whether they were still in good working condition. True to the motto: We don't build toys, we build professional equipment.

But how do you maintain your reputation as a manufacturer of high-quality, reliable garden tools over many decades? Can quality be „commanded“? Or does it come from a tradition that is both lived and cultivated?

NOTHING IS GOOD UNLESS IT IS WELL TESTED

Nowadays, SABO equipment does not fly out of the window. And yet it is a long and difficult road from the first sketch to the first use on the lawn. Before the individual components are put together in production, we check that they meet our strict quality requirements.

The individual components are then assembled in our workshop in Gummersbach, close to Cologne, Germany. Numerous quality tests and inspections follow. In this way, we make sure at every stage of the development process that the mowers really do meet our requirements.

LAWN MOWER TESTING

Every new prototype of a SABO lawn mower has to undergo an ordeal before it goes into mass production. In an impact test, for example, the mechanical strength of the blade is tested using a steel tube and rod.

The vibration, drive and gearbox tests simulate the stresses and strains of everyday use. The blade testing checks the structural strength of the blades. Only after one million load cycles is the blade approved for serial production.

In the ball impact test, hardened steel balls are shot into the running blade and chassis, providing information on structural strength and shielding. In addition, our experts put the products through their paces under the toughest conditions in the open field test. All this is the hallmark of a SABO product and is the guarantee of our renowned high quality over a lengthy time period.

COLLABORATION IS KEY

The SABO brand is not only characterised by strict quality standards, but above all by a strong community of motivated people. The principle of production at SABO follows its own set of rules. Quality is not dictated here, but deliberately developed, making it the goal of every single employee.

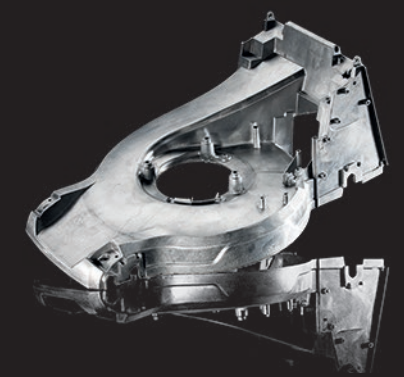

Everyone involved is called upon to get involved. This means taking responsibility and getting involved beyond their own workplace and department. Every day, all employees at SABO make sure that quality is not an exception, but the rule.

COMMUNITY SPIRIT

One of the most important advantages at SABO is the close proximity of sales, development and production at the company's premises in Gummersbach. The routes are short, people know each other and talk face to face. In this way, colleagues become partners in the workplace – and everyone becomes a part of the SABO team. This exceptional feeling of community begins at SABO itself and extends through all departments all the way to our retail partners and customers.

We live and consciously cultivate this sense of community, even beyond the factory gates. It is the cornerstone of a vivid corporate culture and products that meet the highest quality and durability expectations. The experience of more than six decades is built into every SABO mower as standard, which you as a customer can see and feel at first glance.

Our SABO machines offer the highest level of safety, performance and reliability. Everything that you would expect from a good partner.

PERSONALITIES BEHIND THE SABO BRAND

Sabine Schenker
Financial accountant at SABO

Since 1984, I have been part of the SABO family—and I couldn't be more convinced of my choice. My journey began with an apprenticeship as an industrial clerk. After spending several years in machine sales, I took a leap into accounting in 2010 and furthered my education to become a certified financial accountant. Today, I handle a variety of responsibilities for our dealers, particularly in the areas of payment transactions, trade credit insurance, and association billing. Managing master data updates and onboarding new specialized dealers also falls within my scope of work.

I love combining structure and flexibility in my job—there's never a dull moment. My day often starts early, usually around 7 a.m., allowing me to balance time for my family and home life. Achieving a healthy work-life balance has always been important to me, and SABO has supported me throughout the years in making it possible to manage both.

'SABO is more than just a workplace for me'

What I particularly value about SABO is the strong sense of solidarity. Here, we help each other out when it matters most. Whether during hectic times or when facing challenges, we all pull together. Even in my personal life, my heart beats for SABO. Our garden now boasts almost every device in the SABO range—whether it's a shredder, mower, or chainsaw. It fills me with pride to not only know our products from the office but also to use them at home and see their quality in action. I'm truly grateful to be part of this amazing team.

Kay Kaulisch
Maintenance technician at SABO

Since 2008, I have been part of the SABO team and deeply connected to the company ever since. As a maintenance technician, it's my responsibility to keep our machinery in top shape—from repairs and maintenance to coordinating with external service providers. But my role extends beyond that. As a "jack-of-all-trades," I step in wherever technical solutions are needed or assistance is required.

My workday is as diverse as my tasks themselves, and every morning brings new challenges to tackle—whether it's in mechanical engineering, maintenance, or facility management.

My journey with SABO began with an apprenticeship, which I successfully completed here. From the start, it was clear to me: I wanted to stay. Not just because of the exciting tasks but also because of the people. At SABO, we work together as a team, standing by each other through both good times and challenges.

The combination of camaraderie and passion for the product makes SABO special to me. It's a place where you feel at home and know you can count on others—just like in a great partnership.

'The variety keeps my job exciting'

Elisabeth Rautenberg
Assembly technician at SABO

For 33 years, I have proudly been part of the SABO team. My main responsibility is the pre-assembly of handlebars, but I'm always ready to lend a hand wherever I'm needed. Every task I tackle during the day matters to me—it's about setting a goal each morning and accomplishing it by the end of the day.

For me, teamwork and solidarity are everything. What I value most about my work are my colleagues and the close collaboration we share. We may not be a large team, but we are a small family that can always count on one another.

When I first joined SABO, it was simply because I needed a job. What started as a pragmatic decision quickly evolved into a professional home. Today, I can confidently say that at SABO, I found not just a role but a place where I truly belong. As the only woman in the assembly department, I've worked hard to earn the respect of my colleagues—and I'm proud of that. It hasn't always been easy, but the recognition I've received from my peers proves that perseverance and dedication pay off. This journey has not only made me stronger but also deepened my connection with the team.

'As a woman in assembly, I've earned my respect—and I'm proud of it'

Over the years, I've come to deeply appreciate both my work and the people I share it with. SABO is much more to me than just a workplace. After more than three decades, I can say with pride that I've grown old with SABO—and I consider that a tremendous privilege. The sense of unity, the mutual support, and the familial atmosphere define this place and make it truly special for me.

Hans Christian Lashon
Customer Service Technician at SABO.

For 25 years now, I've been part of the SABO team—a journey that, for me, actually began by chance. In 1998, I was looking for a structured day-shift position to support my evening school schedule, and I took on an open role at SABO.

A year later, I became a permanent member of the team. Today, I work in technical customer service, addressing the needs of our specialized dealers and end customers. Whether over the phone or in writing, I handle consultations, troubleshoot problems, and process warranty cases. What I enjoy most is helping customers and dealers in seemingly hopeless situations. Providing them with a solution, restoring their confidence, and showing them they made the right choice with SABO is what drives me.

'For me, it's all about finding solutions and building trust'

What makes SABO truly special to me is the familial sense of camaraderie that has endured over the years. Despite structural changes and various challenges, the team has grown even closer, and this sense of togetherness is a key reason for my long tenure. Each day feels like a unique project, with my focus always on enhancing SABO's reputation and ensuring customer satisfaction.

I take pride in being part of one of the leading manufacturers of garden products and live by the motto: "We are among the very best."

One standout moment for me? September 13, 2023—a day when we reclaimed our success and took charge of our future. SABO represents more than just reliable products; it's also a team and work culture that continually motivates me and fuels my passion.

EMPOWERING YOUR GARDEN WITH SABO.

**Hedge trimmer
HC-66**

The double-sided sharpened blades guarantee precise results, while the three-way adjustable multi-function handle ensures comfortable handling. The sturdy magnesium body ensures high stability and long life.

**Leaf blower
LB-934**

With infinitely variable, lockable speed and a powerful boost function that effortlessly removes even the toughest leaves and dirt.

The heart of the SABO battery system is the powerful and reliable 40-volt lithium-ion battery. It can be easily removed and inserted, making charging particularly convenient. Maximum flexibility for all your gardening tasks.

**Scarifiers
33-V ACCU**

With a working width of 33 cm, it is ideal for precise work on small to medium-sized lawns. Its compact size makes it easy to maneuver in narrow gardens and around obstacles. The scarifier has a dual battery slot, which offers longer running time and more flexibility.

**Pole saw / pole hedge trimmer
COMBI-TOOL**

A pole saw with a 25 cm blade and a speed of 9.8 m/s. The extension pole allows you to cut branches that are difficult to reach. The Pole Hedge Trimmer has a 51 cm blade with twin blades that can easily cut branches up to 30 mm thick.

**Brush cutter
ST-30**

**Brush cutter
MS-36**

Perfectly equipped for the challenges of dense grass and undergrowth, the MS-36 can be used with either a line spool or a high quality blade, while the handy carrying strap provides added convenience. The ST-30 is lightweight and easy to handle, making it ideal for precision work.

**Chainsaw
CS-25**

It reaches a chain speed of 20 m/s with a chain stop time of less than 0.2 seconds. At 3.8 kg, it is comfortable to hold. In a package with a 25 & 35 cm chain bar.

**Lawn mower
47-ACCU VARIO**

A total of five lawnmowers, with and without drive, are available in the SABO battery system.

These include the 47-ACCU VARIO with double battery slot: with the SABO TurboStar-System™, it ensures optimum collection results even in wet grass. The robust aluminium chassis with a 15-year guarantee is particularly durable. The variable rear-wheel drive allows effortless operation even on slopes.

* SABO warranty conditions apply

SABO 47-VARIO E

Top of the range mower with powerful SABO engine: Enjoy high mowing comfort with a 65 litre collector capacity and variable drive. The electric instant start allows you to start quickly with the ignition key.

SABO 47-ACCUMARIO

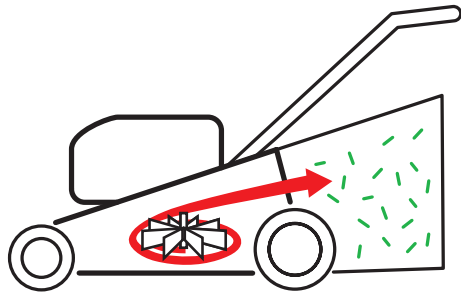

The variable rear-wheel drive keeps this large battery-powered lawnmower moving forward safely. The central indicator on the handlebar provides easy speed control and a clear indication of battery status. Compatible with the powerful 40 V battery.

For home lawn mowers, see page 26
For professional lawn mowers, see page 38

LAWN MOWERS

Novice, hobbyist or professional? Small, medium or large lawn areas? It doesn't matter. Our range of SABO lawnmowers has just the right machine for every need.

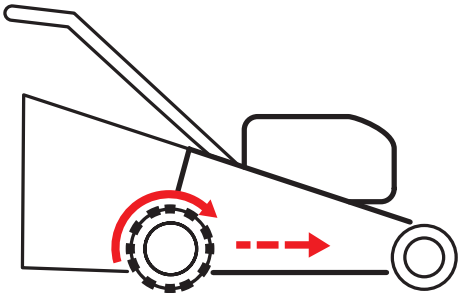

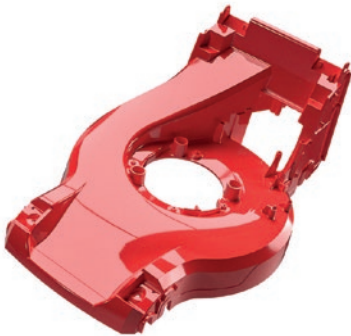

TURBOSTAR™-SYSTEM

Most of our mowers are equipped with SABO's patented TurboStar™ system, which ensures that the grass is raised before it is cut and is effectively transported into the collection bag - even if it is damp.

ALUMINIUM CHASSIS

Many of our SABO mowers are equipped with a high-quality aluminium chassis. This makes them lightweight and extremely robust - and includes a 15-year warranty*.

REAR WHEEL DRIVE OPTION

Do you mow on rough or challenging terrain? No worries: the optional rear-wheel drive ensures that your SABO and your mowing project progress safely. On many models, this can be variably adjusted to the walking speed.

HIGH PERFORMANCE BLADE

The single-piece blade is made from the highest quality spring steel and is manufactured in accordance with the most stringent production and safety guidelines.

* SABO warranty conditions apply

SCARIFIERS

Scarifying loosens the lawn soil to create space for new grass growth and to ensure the grass roots receive sufficient amounts of air, water and nutrients. This enables fresh, healthy and dense new grass to grow back.

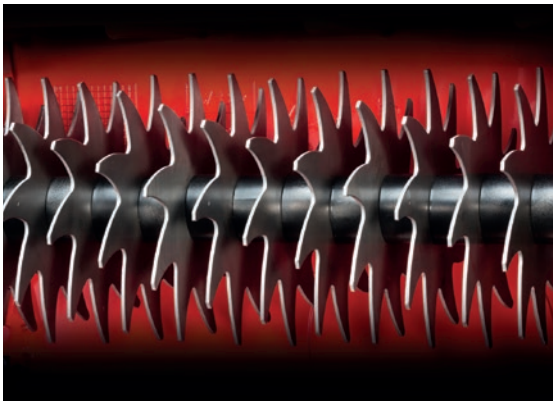

YOUR CHOICE

Whether it's a powerful petrol engine for large areas or a modern, environmentally friendly battery drive for noise-sensitive areas, the choice is yours.

SHARP, PRECISE, EFFECTIVE:

SABO scarifiers score the ground to a depth of just a few millimetres with their blades made of high-quality spring steel. The infinitely variable working depth adjustment allows you to adapt the depth precisely to the requirements of your lawn and the soil conditions.

OUT WITH THE MOSS, IN WITH THE GREEN

Old grass, moss and weeds don't stand a chance. SABO scarifiers gently and naturally rid your lawn of unwanted debris. The result is a perfectly maintained, vibrant lawn.

BEST RESULTS MADE EASY

For added convenience, the grass clippings can be deposited directly into the collector bag available as an accessory. This not only keeps your lawn healthy, but also tidy and clean - without the hassle of reworking.

SABO 33-V ACCU

With battery operation and a working width of 33 cm, it is ideal for small to medium-sized lawns. The dual battery slot, which is powered by the powerful 40 V battery from the SABO battery system, ensures a longer runtime.

SABO 38-BV

The powerful 38-BV petrol scarifier delivers outstanding results with its 38 cm working width, powerful 4-stroke OHV engine, robust and durable aluminium body and 15 sharp verticutter blades.

You can learn more about our scarifiers on page 34

LAWN TRACTORS

Discover effortless efficiency for large lawns with SABO lawn tractors. Equipped with powerful 2-cylinder engines, impressive power and hydrostatic drive, they are designed for the most demanding tasks.

Learn more on page 35

EASY GRASS BOX EMPTYING

The 93-H and 103-H grass catcher box can be emptied with one handle using the tilting mechanism.

CONVENIENT TRAILER COUPLING

The standard trailer hitch allows you to use a wide range of attachments.

EASILY REMOVABLE CUTTING DECK

The robust steel deck can be removed in a few easy steps.

LED HEADLIGHTS

Bright LED headlights provide excellent visibility even when working in the dark.

ROBUST BUMPER

For increased durability and shock absorption.

EXTRA WIDE TYRES

The 18-inch tyres provide optimum traction and protect the lawn.

GENUINE MULTI-TALENTS

Convert your SABO lawn tractor for winter service with the optional attachment frame. With the practical attachable sweeper you can easily and effectively take care of many jobs around your property.

Compatible with accessories from:

Snow plough

For winter service with your SABO lawn tractor

Tielbürger TS125

Turn your lawn tractor into a powerful snow clearing vehicle with the TS125 snow plough: the rubber blade supplied as standard protects the ground.

Attachment sweeper

With a working width of 120 cm, including a hopper for the debris.

Tielbürger TK520

120 cm working width, including a hopper for the debris. With the TK520, grounds maintenance is a snap. Available with a range of practical accessories.

Petrol drive

95 - 110 cm cutting width

Covers areas up to 10,000 m²

Rear and side discharge

Extra strong frame

Lawn-friendly tyres

Acoustic fill level indicator

2-CYLINDER
ENGINE

SMALL
TURNING-
RADIUS

QUICK
CATCH BOX-
EMPTYING

EXTRA
WIDE
TYRES

COMFORT FOR LARGE AREAS

Our high performance models offer uncompromising cutting results and convenient control from the driver's seat. Not only does this save you effort and energy, but it also makes it easier for you to work on larger lawns.

GARDEN SHREDDER

**LOW NOISE AND
REDUCED VIBRATION**

The ingenious shredding system ensures low operating noise. The double wall of the shredding chamber and rubber buffers under the motor base and bearing also minimise vibration and noise.

**PERFECT
WOOD CHIPS**

The shredded material is highly compacted, perfectly shredded and provides the perfect structure for rapid composting with an ideal moisture content.

The COMSTAR 210 garden shredder effortlessly turns branches, leaves and green waste into fine shredded material - efficiently, vibration-free and quietly. The patented shredding technology not only delivers impressive results, but also facilitates the sustainable management of garden waste.

Learn more on page 36

**PATENTED CHIPPING
TECHNOLOGY**

The COMSTAR uses the innovative ELIET CHOPPING PRINCIPLE™ to efficiently chop wood along the fibres. Specially designed blades work like small axes to ensure effortless chipping.

VANGUARD 200 4-STROKE ENGINE
1-Cylinder | 6,5 HP | 203cc

STEEL FRAME
Tough and durable

3,1 LITRE FUEL TANK
Ready for extended operations

BIG FILLING CHUTE
with 300 x 250 mm opening and two protective flaps

87 LITRE CATCH BOX
Equivalent to the volume of a standard wheelbarrow

SABO PRO WHEELS
Steel wheels with solid rubber tyres, size 210 x 50 mm

For branches up to 50 mm in diameter

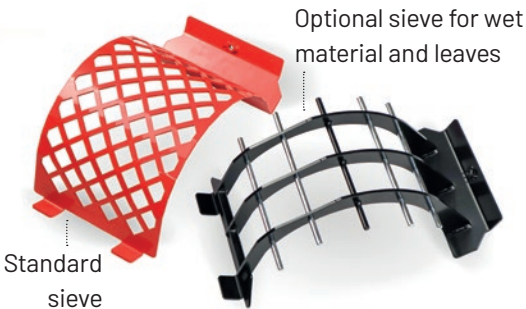

**USER-FRIENDLY
AND COMPACT.**

The feed hopper can be completely removed for easy storage or transport: ideal for space-saving storage.

**HIGH PERFORMANCE
EFFICIENCY**

With 58,000 cutting strokes per minute, the COMSTAR shreds branches and green waste very quickly: it takes just five minutes to fill a wheelbarrow with finely shredded material.

SABO 54-PRO VARIO

A truly professional rear discharge mower. The 54-PRO VARIO is manoeuvrability, easy to handle and offers a cutting width of 54 cm and a large 75-litre grass bag. Its 4-stroke OHV engine is extremely robust and durable.

SABO 52-PRO S K A PLUS

With a cutting width of 50 cm and a 6 litre fuel capacity, this side discharge mower is ideal for use up to 5,000 m². The variable drive makes the job a lot easier for the professional user. Low vibration due to the anti-vibration system.

Commercial mowers can be found on page 38
Commercial scarifiers can be found on page 34

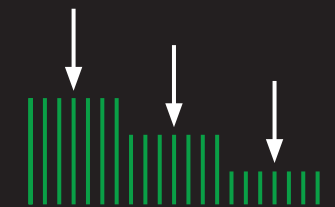

PRO-MODELS

Powerful and resilient. With powerful engines and lots of features. For large lawns and plots. For decades many municipal and commercial users have relied on our on our reliable, robust technology.

FLEXIBLE CUTTING HEIGHT ADJUSTMENT

Steel wheels provide impressive traction and durability. The individually adjustable cutting height of our professionals allows you to switch between cutting heights with ease.

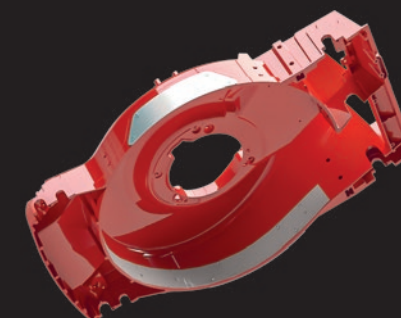

ANTI-VIBRATION SYSTEM

Reduces vibrations on the handlebar, allowing the mower to be operated throughout the working day without compromising comfort or safety. Available on most professional models.

ROBUST TRANSMISSION

The professional transmission on our mowers provides torque output independent of shifting force, ensuring high performance and a long service life.

PRO ALUMINIUM CHASSIS

The aluminium chassis is extremely robust and designed for continuous use in the harshest conditions. Additional steel reinforcements on the inside and outside further increase durability.

SABO BATTERY POWER FOR PROFESSIONALS

The professional battery tools from SABO are your reliable companions for demanding gardening and landscaping work. With the modern 56 V cordless drive from EGO, they offer the right combination of power, flexibility and robustness.

LOW VIBRATION LEVELS

SABO's professional battery-powered tools are distinguished by their particularly low vibration levels. This is easy on the joints and makes all-day use noticeably more pleasant and less stressful – for maximum comfort in every task.

LOW NOISE LEVEL

Our professional battery machines are so quiet that you can use them in noise-sensitive areas, without compromising on performance.

53-PRO E M VARIO

Powerful, precise and ergonomic, our professional mulcher is ideal for large lawns and the toughest conditions. With cutting height adjustment on each axle, VARIO drive for flexible speed and robust transmission, it offers maximum efficiency and durability.

THE WEATHER? DOESN'T MATTER

The fully sealed lithium-ion battery cells withstand rain and extreme weather conditions and deliver consistently reliable power. Whether it's a hot summer's day or a cold autumn's day, SABO professional cordless tools are unaffected.

DUAL POWER

Two powerful lithium-ion batteries provide constant high power for long runtime. The main switch allows you to switch off the unit safely and completely.

DRIVE SYSTEM

Flexible speed control: The drive on all VARIO mowers can be conveniently controlled directly from the handlebar, so you can work efficiently even on steep terrain.

TO SUIT ALL NEEDS:

Three rear discharge lawnmowers, a side discharge model, a mulching mower and a scarifier. Discover the full range of SABO battery-powered products on page 40.

SECURE START

Starting the professional battery mower models is as easy as it is safe: the blade only starts when the safety lever and the start button are pressed simultaneously.

ECO TURBO

POWER WHEN NEEDED

Our professional battery lawnmowers offer two power levels: ECO mode maximises runtime, while POWER mode delivers full power.

45-PRO E V

Professional scarifier with 45 cm working width, 19 ball-bearing blades and infinite working depth adjustment. The robust aluminium body and vertical 56 V, 3.2 kW power head make it the perfect choice for professional users – quiet, emission-free and durable.

Garden shredder

COMSTAR 210

Perfect for composting
BioTech™-shreds

Thanks to the CHOPPING PRINCIPLE™ cutting process, the BioTech™ chips produced by the COMSTAR are highly compressed and finely shredded. This optimum fibre structure accelerates the decomposition process and ensures a loose mixture with an ideal moisture content. The result is an efficient composting process and high quality compost for your garden.

Valuable for your lawn
Composting

A well-functioning compost is at the heart of a sustainable garden. With the COMSTAR you can turn green waste into high quality compost. The finely shredded material ensures an optimal balance between green and woody material, promotes oxygenation and maintains ideal moisture levels.

The result is nutrient-rich compost that works as a soil conditioner, weed killer and fertiliser for a healthy garden.

Natural care for soil and plants
Mulch

The fine chips of COMSTAR are perfect for mulching in flower beds or under shrubs. A 5cm layer of mulch inhibits weed growth, regulates soil moisture and protects against erosion during heavy rainfall. At the same time, it keeps the soil moist longer during dry periods and ensures healthy plant growth - without the use of herbicides.

Equipped for all garden waste
Variety

From coarse hedge cuttings to wet leaves, the COMSTAR handles a wide range of garden waste with ease. Thanks to its special shredding system, it can cope with thick branches as well as fine, leafy cuttings.

With the optional 'wet material and leaf screen' (item no. SAE10426), throughput remains high and the chipper remains clog-free, even with wet waste. This makes the COMSTAR a reliable partner for year-round garden maintenance.

MUNICIPAL MOWERS

The powerful SABO high grass mowers and trimmers have been specially developed for the demanding tasks of garden and landscape maintenance. Whether mowing overgrown areas or cleaning paths and yards, these machines are equipped to meet any challenge.

60-PRO T PUSH

Efficient and precise: the 60-PRO T PUSH is ideal for cleaning paved paths and squares. The powerful HONDA GCV 200 engine and the 40 cm wheels offer maximum manoeuvrability, while the laterally adjustable trimmer head ensures precise results.

60-PRO T DRIVE

For hilly and extreme terrain, the 60-PRO T DRIVE combines the HONDA GCV 200 engine with a switchable drive, robust 13" pneumatic tyres and an efficient gearbox.

The ergonomically adjustable handle ensures comfort during long working sessions.

50-PRO C DRIVE

For difficult terrain, the 50-PRO C DRIVE is a powerful open deck mower with a HONDA GXV 160 engine.

Thanks to its excellent hill-climbing ability and pneumatic tyres, it works efficiently even in difficult terrain.
